

P SERIE

Efficient sewer cleaning for the municipal sector

The new P series is specially designed for the professional cleaning of sewer openings and manholes.

Its compact design and high manoeuvrability make it ideal for use in urban areas and confined spaces.

Equipped with a powerful vacuum pump and state-of-the-art technology, the vehicle ensures fast, thorough and environmentally friendly removal of sludge, leaves and deposits.

It is the perfect solution for local authorities and service providers who rely on efficient sewer cleaning.

Our product variants:

Horizontal tank

- Emptying through free outlet or by pressurisation
- Rear bottom flap opens hydraulically

Tank with tilting function:

- Simplified emptying due to tiltable tank
- No restrictions in the selection of options

Tank with push-out piston:

- Emptying by means of extension piston
- Movement of the discharge piston by means of positive and negative pressure.
